EXO Comment construire le cercle inscrit?

Δ équilatéral
 en A

$SS: AB = AC$
 $\hat{A} = \hat{C} = \hat{B}$

- médiane
 en A
 est $\frac{1}{2}[BC]$

Δ équilatéral

ABC est

$AB = AC = BC$

$\hat{A} = \hat{B} = \hat{C}$

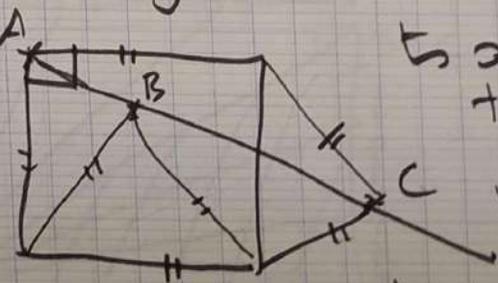

- au moins 2 médianes

de ABC sont

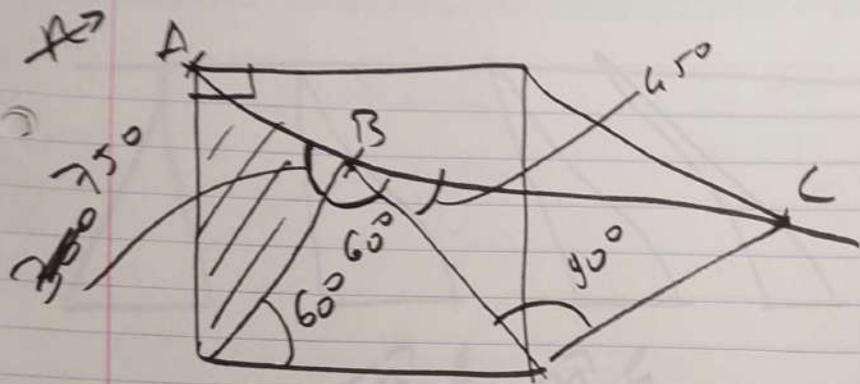

également des hauteurs

- il est facile en un point
sont aux mêmes 60°

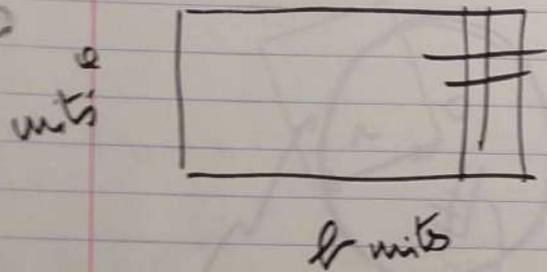

EXO

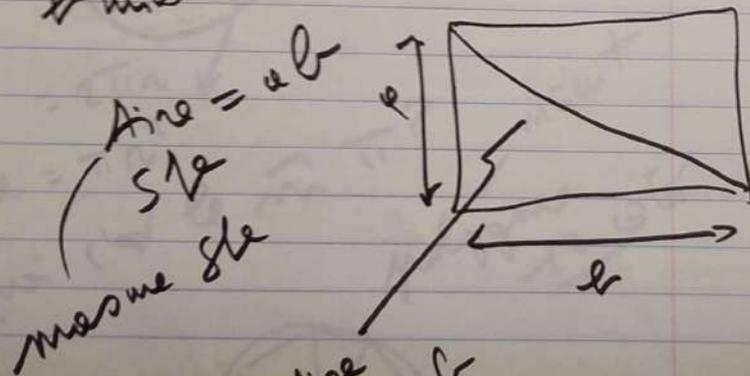

montrer que
ABC sont alignés

THE TRIANGLE

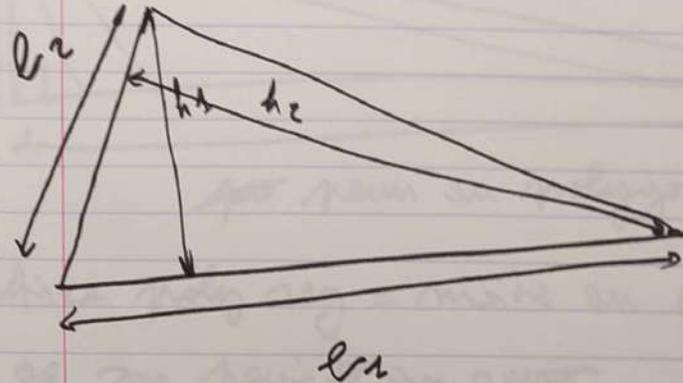

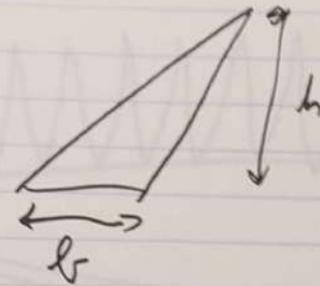

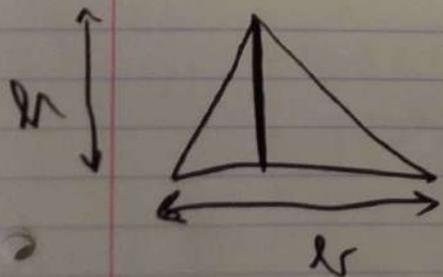

$a \times b$ $5 \times 3 = 3 \times 5$
multiplication

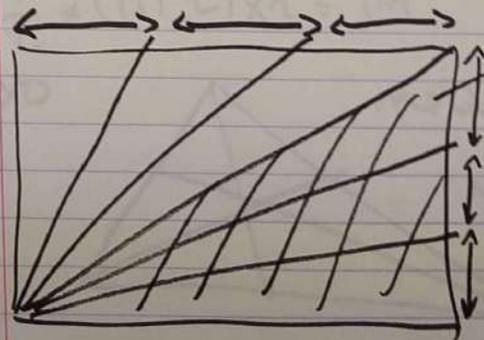

Area = $a \times b$
side

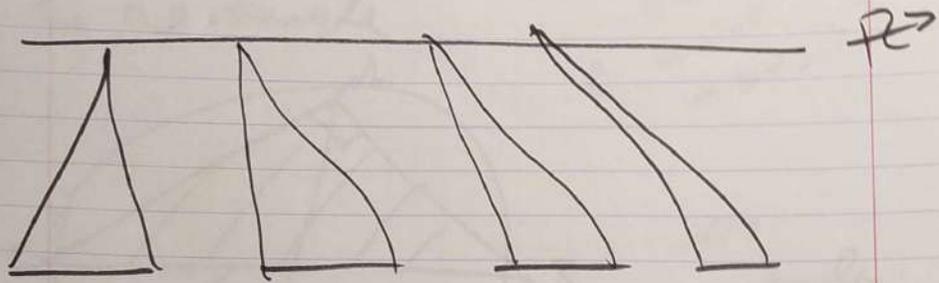

Area = $\frac{1}{2} a \times b$

$A = \frac{1}{2} b \times h$

$b_1 h_1 = b_2 h_2$ $\frac{1}{2} / \frac{1}{2}$

n & $n+1$

Retour au cercle

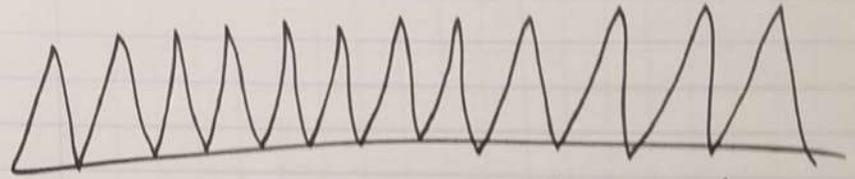

Périmètre = $2\pi r$

Aire = πr^2

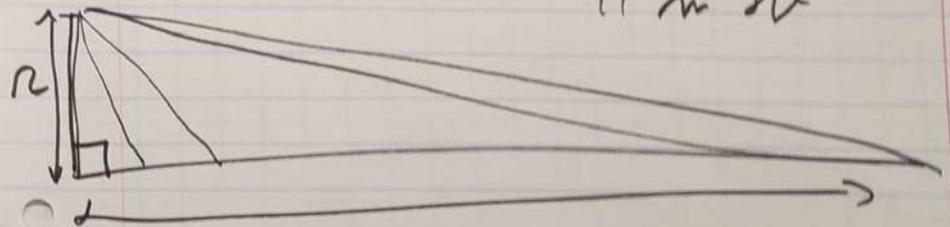

Pourquoi diviser le πr^2 par π ? inscrit
 polygone 12 côtés

12x

11 m st

peu en polygone

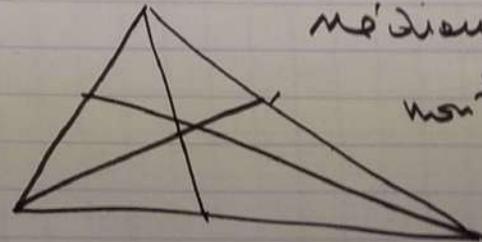

Aire poly reg = moitié du produit
 de son périmètre et du rayon

car on
 coupe en
 corde au centre

$$\frac{1}{2} \times (2\pi r) \times r = \pi r^2$$

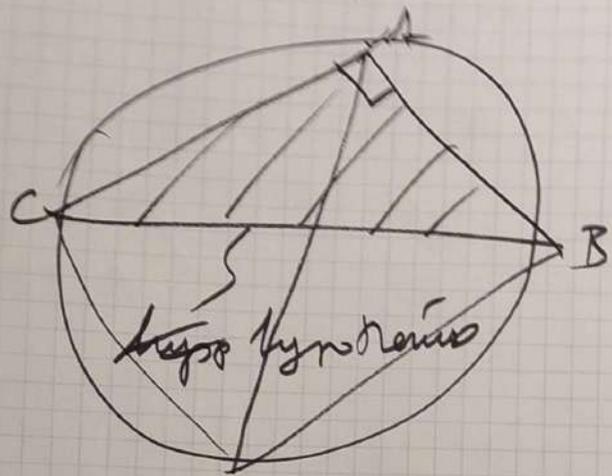

EYO
